It also mentioned that A7A5 — a sanctioned ruble-pegged stablecoin issued in Kyrgyzstan — is a major example of this trend as it facilitates cross-border payments for both institutional and business users.

“Gold added over \$300 billion to its market cap today,” said crypto analyst Sykodelic on Thursday. “It’s been adding an entire Bitcoin market cap in one week.”

“Looking over the historical PNLs so far, models generally have very large price swings, like being up \$3,000 - \$4,000 but then making a bad trade or getting caught on big moves, causing the LLM to close the trade.”

Blockchain security is the foundation and guarantee for the development of blockchain technology. Due to the complexity of blockchain systems, their security issues involve multiple aspects such as cryptography, consensus mechanisms, and network security. Common security threats include 51% attacks, smart contract vulnerabilities, private key leakage, etc. To ensure the security of blockchain systems, measures need to be taken from multiple levels such as technology, management, and law. With the widespread application of blockchain technology, blockchain security will become increasingly important and will attract more professional talents to engage in it.
