It argued that Aave's treasury had enough surplus cash to execute the buyback without compromising its operational expenses or reserves.

When you've been around markets long enough, you start to see patterns. The tools we trade on and the rails we build on are never static. In crypto, one of the biggest shifts happening right now is at the base layer.

Decentralization concerns are also significant. Institutional staking may enhance validator control, granting large funds outsized influence over governance and network security of the underlying blockchains. This would be against the core principles of decentralization.
