Researchers say bitcoinlib is a "widely used open-source library" that allows crypto wallets to be created and managed—attracting more than one million downloads since its launch.

The emergence of corporate L1s changes the liquidity map. If Stripe's Tempo gains traction with merchants, you'll see predictable, high-volume flows, which is great for low-risk, yield-capture strategies. The volatility and the asymmetric opportunities will still be in the permissionless frontier, however, where protocol changes, governance shifts, or market narratives can swing valuations overnight.

“While differentiating between this content is a technical challenge for search engines, we're making ongoing improvements to better surface legitimate content and downrank explicit fake content,” Google said. In regards to CSAM, the Google spokesperson said the company takes this subject very seriously and has dedicated an entire team specially to combat this illegal content.

Decentralization concerns are also significant. Institutional staking may enhance validator control, granting large funds outsized influence over governance and network security of the underlying blockchains. This would be against the core principles of decentralization.

“I believe some of the sell-off is due to a cohort of market participants stuck to the four-year cycle,” Matthew Nay, a research analyst at Messari, told Decrypt. “If you look at the timing, it's almost exactly four years since we topped last cycle, and when you throw in trade war uncertainty, it allows them to defend their positions more aggressively.”
