"What that means is that when you remove a result from search under our policies, in addition, what we'll do is on any query that includes your name—or would be likely to surface that page from search—all explicit results will be filtered," the spokesperson said. "So not all explicit results will be removed, but all explicit results will be filtered on those searches, which prevents them from appearing on searches where it would be likely to show up."

"This is the largest decline since 1973–more than 50 years ago," Stephen Gregory, founder of crypto trading platform Vtrader, told Decrypt.

The introduction of Google's AI summaries has raised huge red flags for web publishers, however, as users are less likely to visit their sites if the information is extracted and provided up front. The issue is compounded by AI's tendency to hallucinate, and even provide dangerous answers based on flawed sources.

The stated objective for the models is to maximize their risk-adjusted returns. The rules emphasize autonomy, requiring each AI to independently generate its trading ideas, size and time its trades, and manage its own risk, with all model outputs and corresponding trades made public for transparency.

Experts highlight a stark divergence between Ethereum's bearish options activity and bullish institutional inflows.

High-end brands are also joining in: Gucci and Ralph Lauren have continued to expand their crypto payment options at select flagship stores, particularly for their more exclusive collections.
