Addressing the reasons behind the dip, Stahel pointed to the growing fear of missing out (FOMO), as “gold frenzy” momentum built up amid investors increasingly seeking exposure to gold equity, physical gold bars and tokenized gold.

Digital wallets are essential tools for entering the blockchain world. They are not only used to store cryptocurrencies but also to manage users' digital identities and interact with DApps. According to different storage methods, digital wallets can be divided into hardware wallets, software wallets, and paper wallets. Among them, hardware wallets have the highest security but are less convenient to use; software

wallets (including desktop wallets, mobile wallets, and web wallets) are convenient to use but have relatively lower security. Choosing a suitable digital wallet requires balancing security and convenience according to individual needs and asset scale.

"We will learn from the prototype, make it better, and then integrate the tech into ChatGPT to make it real-time and maximally helpful," he said.
