Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct

peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

According to ReversingLabs, they were detected using sophisticated algorithms that determine whether packages behave in a similar way to malware discovered in the past.

He warned against loosening traditional corporate rules for crypto treasuries, noting they protect against "volatility arbitrage shells disguised as leveraged Bitcoin plays" that led to the recent retail losses.

Half of those polled said that BTC will maintain between $100,000 and $150,000 over the same time period. Half the users—who were polled between the end of July and August 10—told the exchange they intend to increase their Bitcoin holdings.
