Comprehensive Guide to binance futures trading referral code

How to read: Breakouts often follow the existing trend but can occasionally reverse it. Estimate the price target by measuring the base width of the triangle and projecting it from the breakout point. A breakout upward in an uptrend is typically bullish, while a breakdown in a downtrend is bearish. To avoid false signals, use a 1%-2% filter before confirming a move.

The cycle repeats in the early 2020s, with an examination of a lesser-known hack of Indexed Finance. The exploit was allegedly perpetrated by an attacker alternatively named Umbril Upsilon and Zeta Zeros, who would eventually be identified as the teenager Andean Medjedovic.

“The USD is now on track for its worst year since 1973, down over 10% year-to-date. The USD has lost 40% of its purchasing power since 2000,” The Kobeissi Letter wrote.

Mt. Gox’s extended Bitcoin repayment deadline nears

Funding (perpetuals): Perpetual futures don’t expire, so exchanges use periodic funding payments between longs and shorts to keep prices aligned with the spot market. When funding turns strongly positive, longs pay shorts — typically a sign of crowded long positioning. Deeply negative funding indicates the opposite: crowded shorts. Extreme readings often precede mean-reverting moves.

OpenAI’s ChatGPT-5 slipped to last place, with an over 66% loss, taking its initial account value of \$10,000 to just \$3,453 at the time of writing.
