The agency opened a comment period in August, which closed on Tuesday.

The stated objective for the models is to maximize their risk-adjusted returns. The rules emphasize autonomy, requiring each AI to independently generate its trading ideas, size and time its trades, and manage its own risk, with all model outputs and corresponding trades made public for transparency.

North Korean hackers have adopted a method of deploying malware designed to steal crypto and sensitive information by embedding malicious code into smart contracts on public blockchain networks, according to Google's Threat Intelligence Group.

When it comes to crypto investing, such an attitude could translate into a “readiness to engage with new and unconventional assets,” he added.

Google global search interest for the term “Bitcoin” dropped to 19 last week, coinciding with Bitcoin’s flash crash on Friday, according to Google Trends.

“Such a system would maintain or strengthen law enforcement capabilities while obviating the existing broad and costly financial surveillance regime,” he said.
