Speaking at the National Association for Business Economics conference, Powell said the Fed may soon stop its “quantitative tightening” process, noting that reserves are “somewhat above the level” consistent with ample liquidity.

How to use it: If funding is highly positive and OI is rising into resistance, treat upside breaks with skepticism. This usually signals bull-trap risk. If funding is deeply negative and OI has just flushed below support, be cautious when shorting breakdowns. This often indicates bear-trap risk. Pair these reads with a higher-timeframe retest-and-hold and volume confirmation before increasing position size.

He added that the new bill “cuts red tape for banks and credit unions,” ensuring “law enforcement still has the tools they need to do their job.”
