"The short-term trend—that began with the big liquidation event earlier this month—is down and traders might want to test the technical support in the \$100,000 and \$3,800 levels for BTC and ETH several times before there's either a sustainable rebound or a sharper move lower," he said.

“Trustless vaults eliminate all such trust assumptions. Bob and Larry jointly pre-sign a set of Bitcoin transactions defining conditional spending rights,” the white paper states.

By using trusted custodians, a diversified network of validator partners and transparent reporting, Grayscale has established a secure and compliant way for investors to participate in staking. It has turned staking from a complex, retail-oriented process into a professional investment opportunity.

To some analysts, this inverse behavior suggests that the Bitcoin price is bottoming.
