A high hash rate is important because it means more computing power is being used to keep the cryptocurrency's network secure. And the more computing power used, the harder it is for attackers to take control of more than 50% of the Bitcoin network.

"We must collectively govern the integration of transformative tools like AI, which, powered by the immutable transparency of the blockchain, can finally move AML past the problem of low-value, static data," Fabiano said, calling the evolution "an opportunity, not a constraint" essential to securing a credible, compliant financial ecosystem.

Earlier in May, the firm acquired Canadian crypto platform WonderFi in a $179 million deal, further expanding its global footprint. Robinhood has also been pushing for clearer tokenization regulations in the US, submitting a proposal to the Securities and Exchange Commission for a unified national framework governing RWAs.
