Gold rocketed this year, Bitcoin could benefit

In other words, the slight price bump is not being driven by aggressive buying. Instead, the move coincides with more passive buying.

Miners typically rely on the price of Bitcoin to go up to cover costs but continued volatility for the asset has spurred, some large miners to branch into high-powered computing.

Galaxy shares surged to \$46 when markets opened on Monday, according to Yahoo Finance. Shares were more recently changing hands around \$43, an 8.3%

increase on the day.

Business cycles could impact liquidity

In general, both retail and institutional investors continue to focus on buying and holding tokens for price gains rather than staking them. Operating validator nodes requires substantial capital, technical know-how and uninterrupted uptime. It also exposes participants to risks such as slashing penalties and custody challenges. Additionally, in many jurisdictions, the regulatory treatment of staking rewards remains unclear.
