"The number of new packages that get published on a daily basis is posing a challenge for security organizations, and ML model-based detection is currently the best answer that the security industry can provide," ReversingLabs engineer Karlo Zanki said.

"I think it's fair to say Australians have always had a bit of a speculative streak, we're willing to have a go," Miller told Decrypt.

However, this is not all bad news as DATs with strong capital bases and trading-savvy management teams “may still generate meaningful alpha,” they said.
