Lee stated that many DATs are trading below their net asset value (NAV), or the worth of their underlying crypto holdings. "If that's not already a bubble burst... How would that bubble burst?" he told Fortune on Thursday.

Such an integration would create a multimodal AI tool that can handle various types of media and provide comprehensive search results.

"I think that most fiat currencies, especially those with large debts, will have problems being effective storeholds of wealth and will go down in value relative to hard currencies," he said, pointing to parallels between the coming years and two periods in the 20th century.

The Sun statement the Bubblemaps team was referring to appeared on X in Mandarin. In it, Sun said the wallet “only generally did a few exchange deposit tests, the amounts were very low, then did a distribution to one address.” He added that the tests “did not involve any buying or selling,” and that it would have been impossible for the token movements to have impacted the market.

Woo’s point is that crypto markets don’t exist in isolation and are affected by these broader economic cycles, particularly through their impact on liquidity.
