Etherscan is a blockchain explorer designed for the Ethereum ecosystem. It's widely used by individuals, developers and institutions to verify transactions, monitor smart contracts and analyze token activity. Its reliability and extensive onchain data make it one of the most trusted tools for tracking Ethereum network activity.

In a blog post, the DEX said it was exploring bridging, crosschain swaps and full Uniswap Wallet support for the network. Transactions made through the web app will be routed through the DEX aggregator Jupiter.

The company also claims the stock tokens offer 24-hour market access, no hidden fees beyond a 0.1% FX charge and the ability to start investing with just 1 euro ($1.17).
