How Grayscale's ETPs transform crypto from price tracker to income asset

Chinese artificial intelligence models are outperforming their United States counterparts in cryptocurrency trading, according to data from blockchain analytics platform CoinGlass, as competition between leading generative AI chatbots intensifies.

“Ondo tokenized stocks are fully backed and secured by U.S. stocks and ETFs held at one or more U.S.-registered broker-dealers and cash in transit,” the company said in its announcement. The blog post itself isn’t accessible to users in the U.S. without a VPN to bypass geofencing.

That doesn’t make it hopeless for permissionless builders, but it does change the game. Competing head-to-head on the same vectors (licensing, institutional distribution) is suicide. The opportunity is what the corporate L1s won’t or can’t do.

More advanced traders may be inclined to consider selling covered calls. Covered calls benefit from overbought, parabolic rallies—if the rally stalls, you keep the premium; if price indeed explodes, your gains are capped but protected from a sudden selloff.
