## Comprehensive Guide to binance verified account screenshot

Daily active addresses on BNB Chain hit an all-time high on Monday, as the network's native crypto token reached a new price record.

Ethereum could eventually surpass Bitcoin's market share in a similar manner to how US equities overtook gold 54 years ago, when the US abandoned the gold standard, according to BitMine chair Tom Lee.

ETH derivatives markets show no alarming signs — quite the opposite. Bulls' hesitation to take on leveraged positions appears healthy, particularly after the Oct. 10 extreme volatility. However, Ether's path toward \$4,500 will likely depend on

clearer signals from credit conditions and US labor market data, meaning any recovery could take time.

Half of those polled said that BTC will maintain between \$100,000 and \$150,000 over the same time period. Half the users—who were polled between the end of July and August 10—told the exchange they intend to increase their Bitcoin holdings.

But one token stands out: BNB, formerly known as Binance Coin, is up 24% in the past month and flashing technical signals that suggest either a moonshot to \$2,000 or a face-melting correction is imminent.

This update allows anyone who staked 500,000 HYPE tokens, about \$20 million, to deploy their own perp swap contract with independent margining, orderbooks and parameters.
