The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.

It is also 1.5 times larger than the market capitalization of the “Magnificent 7” largest tech companies on the planet, Nvidia, Microsoft, Apple, Alphabet, Amazon, Meta and Tesla, whose combined market capitalization is just around \$20 trillion.

The next bear market “will be defined by another cycle people forget about,” said Woo on Monday.

The open banking framework, first proposed in 2022 under former U.S. President Joe Biden and finalized on October 22, 2024, allows consumers to securely share financial data with third-party apps through APIs (application programming interfaces).

Bitcoin has broken above \$125,000 for the first time in its 17-year history.

The Average Directional Index, or ADX, sits at 33, well above the critical 25 threshold that confirms a strong trending market. Think of ADX as your “trend strength meter”—it doesn’t care about direction, just whether a real trend exists. Below 20, you’re in choppy waters where false breakouts are common. Above 25, you’ve got momentum. At 33, BNB is firmly in trending territory, meaning institutions and retail are moving in the same direction, creating sustained buying pressure that can carry prices significantly higher.
