Unlike a company's stock market cap, which is based on outstanding shares, the market cap of gold is a calculation of the total value of all the gold that has ever been mined; however, it is impossible to know the exact amount.

This is the latest in a long line of campaigns specifically targeting crypto developers.

It added that there was a "meaningful divergence" of opinion regarding where we are in the market cycle, with 45% of institutions believing markets are in the late stages of the bull run, compared to just 27% of non-institutions.
