Investors piled back into Bitcoin ETFs and their Ethereum counterparts Tuesday, reversing days of outflows, although the fresh investments failed to give the two largest cryptocurrencies by market value a long-lasting bump.

Grok 4 combines a real-time feed of X conversations with web DeepSearch and a higher-reasoning “Grok Think.” That means you can surface sudden narrative spikes on X, ask the model to search broader web sources for context and request a reasoned assessment rather than a one-line summary. XAI’s product notes and recent coverage confirm that DeepSearch and expanded reasoning are core selling points.

At the start of the year, there were about \$205 billion worth of stablecoins in circulation, according to data aggregator DeFi Llama. Within the past week, the total market cap for stablecoins has surpassed \$302 billion. That kind of rapid growth will need to accelerate in the coming years to fulfill Standard Chartered's projections.

Former Consensus researcher Mallesh Pai joined Paradigm as a research adviser in January, before joining Tempo in a full-time role in September, according to his LinkedIn page.

How to read: A rising wedge in an uptrend often signals a potential reversal as momentum weakens, while a falling wedge in a downtrend points to a possible bullish reversal. These patterns can also act as continuation signals when aligned with the prevailing trend. Measure the wedge's height and project it from the breakout point to estimate the target move.

However, the catastrophic losses of models like Gemini highlight the significant risks that make financial institutions wary. A primary concern is the "black box" nature of these systems, where the reasoning behind a trade is often opaque and unexplainable. This lack of transparency is a major hurdle for regulatory compliance and risk management, as establishing trust in a model's decisions is a critical and ongoing effort.
