Think tank wants a communication system

Thin books make fake moves easier. On weekends and during off-hours, liquidity and depth shrink, and spreads widen. A single sweep can push price through an obvious level, only to fade on the retest. Kaiko's data showed Bitcoin's weekend share of trading volume slipping to 16% in 2024. This is a sign of thinner books and higher slippage risk.

The firm also offers Bitcoin and XRP-themed credit cards, all of which offer up to 4% back on purchases in instant crypto rewards.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

Strategy shares rose 5.3% to \$305, according to Yahoo Finance. Although the firm's stock price has dropped 11.5% over the past month, its initial move on Monday lifted it into positive territory on the year, with shares up slightly from \$300 in January.

The "flipping," the idea that Ethereum will one day surpass Bitcoin's market capitalization, has been a topic of debate for years but has gained renewed attention in recent months.
