Crypto needs VCs “for now” to bridge global capital gap, Lubin says

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions

have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

But one token stands out: BNB, formerly known as Binance Coin, is up 24% in the past month and flashing technical signals that suggest either a moonshot to \$2,000 or a face-melting correction is imminent.

The continued aggressive accumulation of Ether occurs despite Lee's opinion that the digital asset treasury bubble may have burst.

The scale of the correction is highly unusual and in theory would only happen "once every 240,000 trading days," Alexander Stahel, a resources investor in Switzerland, observed in a post on X on Tuesday.
