Some analysts speculated that up to 99% of creditors might sell once they received their share. But when repayments actually began, there was “no significant spike” in trading volume, according to CryptoQuant founder Ki Young Ju.

Grayscale’s staking-enabled ETPs have had a significant impact on Wall Street and the broader crypto ecosystem. It connects blockchain-based yield with regulated financial products, turning crypto ETPs from simple price trackers into income-generating assets. The initiative marks a key advance in institutional adoption. Regulated staking on Ethereum and Solana could draw substantial new capital to these networks while acting as a model for products linked to other PoS blockchains or tokenized assets.

By offering regulated and user-friendly investment products, Grayscale allows investors to gain exposure to cryptocurrencies without the challenges of managing wallets, operating nodes or dealing with validator risks. Through staking-enabled offerings like the Grayscale Ethereum Trust (ETHE) and Grayscale Solana Trust (GSOL), Grayscale has integrated the yield-generating features of blockchain networks with the regulatory and custodial standards of traditional finance.
