In an Instagram post, Van der Velden defended Norwood as a creative experiment rather than a threat, likening the project to animation, puppetry, and CGI. "I see AI not as a replacement for people, but as a new tool, a new paintbrush," she wrote.

On Oct. 10, 2024, Kobayashi announced that most repayments to verified creditors had been completed, though many were still pending due to incomplete procedures or processing issues.

Experts say this automation is a crucial source of protection against "the rising tide of software supply chain attacks targeting cryptocurrency," and proves effective

even if malware isn't accompanied by social engineering attacks.

With Google's new update, when a request to remove non-consensual deepfake websites found in a search is received, Google will also work to filter similar search results that include the name of the person being impersonated.

The funds will support energy expansion, mining growth, and new high-performance computing projects, with the move building on earlier steps, the company said.

The proposal, submitted on Wednesday by the Aave Chan Initiative (ACI), seeks to make buybacks a permanent component of Aave's tokenomics. Under the plan, the Aave Finance Committee (AFC) and TokenLogic would lead the execution, repurchasing \$250,000 to \$1.75 million in Aave
