However—and this is crucial—ADX measures strength, not sustainability. A strong reading can persist right until the moment a trend exhausts and reverses, some random whale dumps the coin, or a FUD episode triggers a flash crash. It's like a speedometer showing you're going fast without telling you how much fuel remains.

"I'm very wary of hyper-sensitive investments like crypto," he said, but added he wouldn't "close the door entirely on it."

"In years past, stablecoins were used mostly to settle speculative crypto trades; as of the last couple years, they have become the fastest, cheapest, and most global

way to send a dollar,” the report said.

“Visually, the chart makes it clear that there is a major redistribution taking place: Bitcoin is moving from long-term holders into new addresses managed by ETFs,” he told Decrypt. “As ETFs create demand, supply is being provided by old holders.”

The agency opened a comment period in August, which closed on Tuesday.
