“From cinematic design to surreal architecture and cyberpunk storytelling, the gallery presents a curated selection of today’s most influential digital artists,” the organizers said in a statement.

Ryan Sean Adams, another prominent crypto influencer and noted Ethereum backer, joked that Friday’s news did not break his faith in the decentralization-focused network—but that such a day could come soon.

He added that ETF flows could be a strong predictor of whether Bitcoin manages to escape a Red September—even if it did just see a Red August. A month (or any other period time) is considered red if an asset ends at a lower price than it started.

Grayscale staked 32,000 ETH (about \$150 million) a day after it enabled staking for its Ether ETPs, making it the first US crypto fund issuer to offer staking-based passive income via US-listed spot products.

Uniswap added support for the Solana network to its web app, allowing Solana users to link their wallet and trade Solana-based tokens alongside those from other networks.

A bull trap happens when the price pokes above resistance and then reverses, while a bear trap occurs when the price dips below support and quickly snaps back. These fake breakouts often result from forced liquidations and mean reversion, clearing out crowded positions.
