## Comprehensive Guide to futures fees binance

Crypto market sentiment has also dropped to its lowest level since April, following Friday's historic sell-off, which resulted in over \$20 billion in liquidations on centralized exchanges.

A bull trap happens when the price pokes above resistance and then reverses, while a bear trap occurs when the price dips below support and quickly snaps back. These fake breakouts often result from forced liquidations and mean reversion, clearing out crowded positions.

mining company by market capitalization, announced a new strategy to expand into AI data center infrastructure, aiming to diversify its revenue streams and

strengthen long-term cash flow potential.
