Comprehensive Guide to fwog binance

Funding (perpetuals): Perpetual futures don't expire, so exchanges use periodic funding payments between longs and shorts to keep prices aligned with the spot market. When funding turns strongly positive, longs pay shorts — typically a sign of crowded long positioning. Deeply negative funding indicates the opposite: crowded shorts. Extreme readings often precede mean-reverting moves.

And if a lot of that is being fueled by longtime HODLers converting their stacks into ETF shares, as Maartunn hypothesizes, it's pretty unusual.

Addressing the reasons behind the dip, Stahel pointed to the growing fear of missing out (FOMO), as “gold frenzy” momentum built up amid investors

increasingly seeking exposure to gold equity, physical gold bars and tokenized gold.

Blockchain technology needs clearer rules, too

How has it worked out? During the late-2024-to-mid-2025 rally, media estimates pointed to unrealized gains of \$300 million by December 2024, rising to portfolio values north of \$700 million months later, implying hundreds of millions in profit at peak. Figures move with price, but the pattern was clear in that upswing: Disciplined buying built a meaningful position.

The referral system also proved to be a growth driver, with 25,212 new users brought into the Algorand ecosystem through invitations from friends. By the end of the week, 4,215 participants had successfully completed all the required quests and claimed their non-fungible token (NFT) badges.
