This rush to buy protection is noticeably changing the market and has caused the price of bearish bets to become more expensive than bullish ones, Melville explained. This trend, which started with Bitcoin, has now extended to Ethereum, indicating that Ethereum investors are becoming increasingly cautious.

His post later prompted a response from Ethereum co-founder Vitalik Buterin, who made a point to acknowledge Polygon's achievements in the broader Ethereum community.

This update allows anyone who staked 500,000 HYPE tokens, about \$20 million, to deploy their own perp swap contract with independent margining, orderbooks and parameters.

ETF inflows must return and new ETH buyers must step in for the bulls to have a shot at getting back to \$5,000.

These are the advocates now of a code-is-law ethos, those who think freedom from restraint will advantage them precisely because it is asymmetric. They disproportionately wish to pursue activities that society censures, so a less powerful social conscience disproportionately benefits them.

Without real demand, any breakout attempt might lack the strength required to push ETH above key levels.
