Shareholders welcomed the strategic expansion, as CleanSpark's stock price rose over 13% on Monday, after rising 140% year-to-date in 2025, according to data from Google Finance.

"I think that most fiat currencies, especially those with large debts, will have problems being effective storeholds of wealth and will go down in value relative to hard currencies," he said, pointing to parallels between the coming years and two periods in the 20th century.

That is, of course, if you trust that the planets will align and the trend will remain valid until new year's eve.

Monday alone saw Ether ETFs shed \$145.7 million, bringing total net outflows over the past eight days to \$640.5 million.

The NAV normalization has created a rare entry point for smart investors. Companies now trading at or below NAV offer pure Bitcoin exposure with optionality on future alpha generation and upside from any trading profits.

Ether derivatives data showed moderate unease among bullish traders, but whale positioning suggested most were not expecting a deeper decline. The key question was whether the \$3,700 support would hold as macroeconomic risks intensify.
