While memecoins showed signs of recovery after the crash, another drop came on Friday, with memecoin assets declining from 9%–11% during the day.

The stablecoin has been criticized by the European Union for being used as a tool for sanction evasion by Russia. The US government has also linked A7A5 to Grinex, the successor of Garantex, which was allegedly involved in money laundering and ransomware attacks with \$100 million in transactions related to illicit activities.

In May, figures for global adoption were published by crypto exchange Gemini, showing that most meme coin owners also hold Bitcoin and Ethereum.

While the previously explained part of the system is trustless, some parts remain non-trustless. Per the white paper, Babylon's Bitcoin vault liquidations utilize whitelisted liquidators to monitor the price and vault state, resulting in a liquidation system that is not permissioned and introduces trust assumptions.

As "creator capital markets" advocates hailed the stunt as a raging success, others pushed back. One X commenter said, "This could easily be a bad thing. We don't need more harassment, we need more quality content."

Aave's decentralized autonomous organization (DAO) introduced a proposal to create a long-term, protocol-funded buyback program that would use up to \$50 million in annual revenue to repurchase Aave tokens.
