With Mt. Gox sales off the table, Bitcoin held above \$6,000 for most of the year until November's Bitcoin Cash hard fork rattled the market. Mt. Gox's holdings remained steady at around 142,000 BTC during this period.

The BOJ's next monetary policy meeting is set for Oct. 29. Most analysts expect the central bank to deliver a 0.75% interest rate hike by early 2026, with no clear consensus on the timeline, Reuters reported on Monday.

The NHL's endorsement lends credibility to platforms that have operated in a regulatory gray area while potentially paving the way for other major leagues to follow.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.
