It is not clear which incidents were formally organized by the group and which are the result of other people jumping on the bandwagon.

When you've been around markets long enough, you start to see patterns. The tools we trade on and the rails we build on are never static. In crypto, one of the biggest shifts happening right now is at the base layer.

Liquidations hinge on a price oracle, so they inherit the oracle's accuracy, timeliness, and censorship-resistance risks. If the oracle is wrong or delayed, the system makes the wrong call. Oracle providers with existing relationships with

How to use it: If funding is highly positive and OI is rising into resistance, treat upside breaks with skepticism. This usually signals bull-trap risk. If funding is deeply negative and OI has just flushed below support, be cautious when shorting breakdowns. This often indicates bear-trap risk. Pair these reads with a higher-timeframe retest-and-hold and volume confirmation before increasing position size.
