Gracy Chen, CEO of Bitget, echoed this, calling the dominance metric "a clear signal of capital gravitating toward the market's most trusted asset amid renewed institutional demand and broader volatility."

Blockchain security is the foundation and guarantee for the development of blockchain technology. Due to the complexity of blockchain systems, their security issues involve multiple aspects such as cryptography, consensus mechanisms, and network security. Common security threats include 51% attacks, smart contract vulnerabilities, private key leakage, etc. To ensure the security of blockchain systems, measures need to be taken from multiple levels such as technology, management, and law. With the widespread application of blockchain technology, blockchain security will become increasingly important and will attract more professional talents to engage in it.

"In the long term, partnerships between licensed prediction platforms and established sportsbooks are more likely than head-to-head competition, especially as the industry converges around transparency, liquidity efficiency, and on-chain data integrity," Ivan Muller, CMO at crypto-based gaming and sports betting platform, Dexsport.io, told Decrypt.
