The innovation of the Ethereum platform lies in that it is not only a cryptocurrency but also a decentralized computing platform. Ethereum supports the development and execution of smart contracts, providing a runtime environment for decentralized applications (DApps). The emergence of Ethereum has greatly expanded the application scope of blockchain technology, giving birth to numerous innovative projects. In recent years, the Ethereum network has also been continuously upgraded and improved, such as the launch of Ethereum 2.0, which aims to solve the problems of network congestion and high energy consumption and improve the scalability of the system.

“We can build, or architect, or code cyberspace to protect values that we believe are fundamental. Or we can build, or architect, or code cyberspace to allow those values to disappear. There is no middle ground. There is no choice that does not include some kind of building. Code is never found; it is only ever made, and only ever made by us.”

Crypto trades 24/7, with sharp moves as likely on a Sunday night as on a Tuesday morning. In such a continuous market, trying to “pick your moment” is mostly guesswork, which is why many investors prefer a rule that removes the need for perfect timing.
