Ultimately, Carrone's concerns center around the differing aims of decentralized and centralized entities, and the dangers of allowing any type of fund — not just Paradigm — to have too much sway over the Ethereum ecosystem.

Chart patterns are shapes formed by price movements that help traders anticipate future market trends. These patterns fall into two main categories: reversal patterns, which signal that a current trend may change direction, and continuation patterns, which suggest the trend will likely resume after a brief pause. They stem from market psychology, where emotions like fear, greed and uncertainty drive collective trading behavior and create recognizable shapes on charts.
