Triangle patterns form when price movements create converging trendlines, resulting in a triangular shape. The three main types are ascending (bullish), descending (bearish) and symmetrical (neutral).

Here are five common patterns every crypto investor, including beginners, should know:

The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.

“This helps us understand friction points and opportunities, and keeps us close to the edge of what’s possible,” the announcement reads.
