Yarlagadda noted that crypto exchange-traded products are expected to "open new channels for investor participation through regulated, familiar structures," citing his company's work in building an "institutional backbone" for trading, derivatives, and credit.

In a blog post published in August, Grewal wrote that "The Bank Secrecy Act Is Broken. Technology Can Fix It," saying the current compliance system is "rooted in decades-old requirements that reflect paper-based protocols designed for a financial system" where fund transfers take days.

Analysts remain wary of digital assets' future price path as markets reckon with a re-escalation of the Trump administration's global trade war, inflation and economic worries, and other macroeconomic uncertainties. "It's likely too early to tell if this is the bottom though as wider markets are choppy, particularly gold," James Butterfill, global head of research at crypto asset manager CoinShares told Decrypt.

Also, the candlesticks have started to show signs of extreme FOMO. A parabolic chart is already hyperbullish, but a parabolic chart in which the bodies of the latest candlesticks are moving faster than the support, is probably too good to be true. Common sense says there must be a correction for markets to find some balance.

Also, not every coin came from the market; geothermal mining reportedly added around 474 BTC over three years (small in energy terms, but still additive).
