Among major layer-1 tokens, he singled out Solana for its standout potential. “Solana remains one of the most interesting assets among major altcoins,” Verbitskii noted, citing its strong fundamentals. “If the current market momentum holds, a move toward the \$300 to \$400 range by year-end looks realistic.”

Offering tokenized stocks has become a point of focus for many U.S.-based crypto companies. Crypto exchange Coinbase has said it wants to tokenize stocks since before its IPO and recently renewed the push. Trading platform Robinhood made waves in early July when its tokenized stock offerings included private companies—namely OpenAI and SpaceX.

He also cast doubt on the US government's plan to use stablecoins to protect US dollar hegemony, arguing that stablecoins are only a temporary, short-term fix that does not address the core issue, which is currency debasement.

Blockchain finance is reshaping the traditional financial ecosystem. Through blockchain technology, financial services can achieve decentralization and disintermediation, reduce transaction costs, and improve efficiency. Currently, the main applications of blockchain finance include cross-border payments, digital currencies, decentralized exchanges (DEXs), lending platforms, etc. Compared with traditional finance, blockchain finance has higher transparency and lower entry barriers, providing new possibilities for the development of inclusive finance. However, the development of blockchain finance also faces challenges such as regulatory uncertainty and technical risks, requiring a balance between innovation and regulation.
