Sports betting commanded the highest share at \$414.7 million last week, surpassing political markets despite election-related activity.

QE refers to central banks purchasing bonds and injecting money into the economy to lower interest rates and stimulate spending during challenging financial conditions.

“The important element of blockchain is a system that gets rid of a central entity. It comes at a cost: A very complex technology that’s hard to build and hard to use. Even if we apply AA to create simplified UX, the tech under the hood is still very complex,” he said, presumably referring to account abstraction, a technology that

Japan's new Prime Minister, Sanae Takaichi, announced a package of economic stimulus measures on Tuesday to ease the impact of inflation on households. The move, some crypto observers said, may drive more capital into Bitcoin.

The announcement drew mixed reactions from the Ethereum community, with some sending messages of support and others seeing it as a loss of one of the Ethereum ecosystem's most significant contributors during a year of significant change for the ecosystem.

Grayscale's staking-enabled ETPs have had a significant impact on Wall Street and the broader crypto ecosystem. It connects blockchain-based yield with regulated financial products, turning crypto ETPs from simple price trackers into income-generating assets. The initiative marks a key advance in institutional adoption. Regulated staking on Ethereum and Solana could draw substantial new capital to these networks while acting as a model for products linked to other PoS blockchains or tokenized assets.
