Comprehensive Guide to pepu on binance

According to the Director of Global Macro at Fidelity, Jurrien Timmer, the recent pullback resembled the late-1990s “super bull” phase, when speculative assets saw sharp but temporary drawdowns before surging higher again.

The rise of NFTs (Non-Fungible Tokens) has brought revolutionary changes to digital content creation and trading. Based on blockchain technology, NFTs ensure the uniqueness and immutability of digital assets, solving the problem of digital content being easily copied. NFTs have a very wide range of application scenarios, including digital art, game items, virtual real estate, music works, etc. The rapid development of the NFT market has attracted the participation of many artists, collectors, and investors, and has also provided creators with new monetization

channels. Although there are risks of speculation and bubbles in the NFT market, in the long run, NFTs will inject new vitality into the development of the digital economy.

The exponential moving averages, or EMAs, paint an even prettier picture. These weighted averages give more importance to recent price action, helping identify dynamic support and resistance. For BNB, the setup is textbook: the 50-day EMA rises beneath current price around \$1,050-\$1,070, providing a cushion for pullbacks. The 200-day EMA sits lower still, confirming the longer-term uptrend.

A business cycle downturn is a period of economic contraction where GDP declines, unemployment rises, consumer spending falls, and business activity slows. It is also commonly referred to as a recession and typically follows periods of expansion.

Traders who wait for confirmation look for above-average volume and a strong candle close to validate the move. Without those signals, the risk of a trap rises sharply.

Last week, investors liquidated more than \$19 billion in largely leveraged crypto futures positions.
