The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual

intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.

The crypto market faced its biggest leveraged wipeout in history last weekend, but the turbulence won't leave a lasting mark, according to Bitwise chief investment officer Matt Hougan.

Traders would consider this correction healthy, allowing the token to consolidate gains and work off overbought conditions, bringing RSI back to neutral 50-60 territory. If \$1,050 holds, bulls maintain control and the uptrend stays intact for another leg higher.

"The age of financial magic is ending for Bitcoin treasury companies," stated 10x Research analysts in a report shared with Cointelegraph on Friday.
