North Korean hackers have adopted a method of deploying malware designed to steal crypto and sensitive information by embedding malicious code into smart contracts on public blockchain networks, according to Google's Threat Intelligence Group.

The results could be sending a complex signal to Wall Street, as the two frontrunners represent two vastly different potential futures for artificial intelligence in finance. DeepSeek is reportedly backed by a Chinese quantitative hedge fund, suggesting its success may stem from specialized financial data and expert fine-tuning—an evolutionary step for today's data-driven firms.
