Comprehensive Guide to what is staking binance

"The elephant in the room is are DATs really justified?" Chu questioned, noting "without a credible business case, rigorous governance, robust custody, and transparent risk controls, such DAT structures can become misaligned with shareholder interests and could invite the kind of liquidity and governance risks regulators worry about."

WBTC requires trust because the Bitcoin backing it is held by a centralized custodian who must be trusted not to lose, freeze, or misuse the funds. Users depend on this custodian's honesty and solvency rather than cryptographic guarantees. This is the primary issue addressed by Babylon's trustless
