The way to understand the music is to study the conductors score, she says. As a player, you play one line; as a conductor, you have the tools to understand from the inside how everything is put together.Becoming a conductor isnt the easiest career path, given that there are only so many conducting jobs available. So Xia, now in her third season with the Seattle Symphony as associate conductor, feels especially fortunate. This is my dream job, she says.Her role includes assisting guest conductors, conducting concerts of her own, and working closely with the symphonys education and community engagement department on a variety of initiatives, including a series of community concerts.This season, shes particularly excited to conduct The Four Seasons (May 14), her first subscription debut with the orchestra. No matter what performance you attend, though, she notes you can always count on well-blended sound and a talented group of performers. Its a special ensemble because its quite forward thinking, she says. We do new things in interesting ways. I still find myself really enjoying being an audience member.
