No início de 2017, o mundo viu uma nova versão do lendário simulador de futebol - Pro Evolution Soccer (PES 17). Esta série de jogos tem desfrutado de popularidade sem precedentes por mais de 20 anos e tudo graças ao mundo realista do futebol para o usuário. No projeto recém-criado, os desenvolvedores deram atenção especial aos modos de rede, tendo trabalhado substancialmente cada um deles. Os desenvolvedores também conseguiram criar um editor para PS4, com o qual você pode licenciar os emblemas, uniformes e o nome do time de futebol. PES 2017 uma nova série de simuladores de futebol desenvolvidos pelo famoso estúdio Konami. Este jogo considerado o principal competidor da FIFA, mas justamente essa luta que torna cada versão melhor que a anterior. A série PES popular pelo seu realismo e, na parte nova, chega quase perfeito, permitindo aos jogadores sentir o futebol como se estivesse no estádio. Futebol em PES 17, download torrent que pode ser encontrado em nosso site, mudou. Os jogadores podem experimentar novas maneiras de driblar, chutar a gol, cruzar e uma variedade de fintas. A trajetória de vo da bola parece atraente, que influenciada por muitos fatores: desde o ângulo de saque até o estado da grama em campo. A inteligência artificial passou por transformações. Agora, os atletas controlados pelo sistema tornaram-se mais imprevisíveis, reagem mais fortemente a situações e evitam seus movimentos. Os gráficos e a visualização mudaram para melhor, assim como o nível de detalhes aumentou, novos sons da tribuna apareceram. Os jogadores de seu simulador de futebol favorito notam que tudo se tornou muito mais interessante no PES 17. Os recursos do jogo da nova série incluem: toque real; precisão de passagem; movimento natural do jogador; ferramentas de goleiro; controle total da equipe; estratégia de canto; aprender inteligência artificial. Para o jogo PES 17, download torrent que pode ser encontrada na seção de simuladores de esportes, centenas de novas animações foram adicionadas para dar vida aos jogadores de campo e goleiros. Se você um fã de futebol virtual, então você definitivamente deveria baixar PES 17 de torrent no nosso site e mostre quem o vencedor. SP17 v4 for PES17SmokePatch17 v4(for PES17 PC)version 17.4.0 (all in one) (23.Nov.2021)update 17.4.3 (2.Mar.2022)-----update 17.4.3is available:- added a fix for various players not showing boots- added a fix for Man United and other database fixesprevious updates included:- updated major winter transfers (+3000 transfers)- updated player stats (Konami new stats)- added more youth players- updated more kits- recovered some teams previously not showing in the game- graphic updates (emblems, flags, ...)- multiple patch system enhancements- includes the previous updates* no relegation/promotion for the new season of some leagues, which will be upgraded in later versions to preserve current master league modes.* Find the patch information and description below:sp17 v4 is converted from the new season patchsp21 v4, some features might defer and have to be adapted depending on the game, see details below.* Many features and contents are not convertible back to PES17.* Most SP17 addons will not get any further updates.* Do not continue FL modes started with last season's patch. (more notes in the description)* SmokePatch does not include any real faces. (available as an optional add-on)-----Game Restrictions:Chile leaguethis league has 16 teams instead of the 17 of this season, adding the 17th team will bug pes2017Other missing teams:PES17 cannot handle the number of teams as in newer versions, SP17 v4 is maxed up and used all the possible slots to have the maximum that the game can handleSquad number:the maximum number of players in a team is 32 instead of 40 in newer games, players who cannot be added are available as free agents, also the number of players in the national teams is limited to 23 (26 in newer games)football life start year:this is not editable and changing it will most probably bug the game as it needs EXE changes, smokepatch does not change the default starting year of the game.-----SP17 General Features- compatible with all PES 2017 game versions- ready for season 21/22- adds a lot of clubs and national teams to the game- all teams, leagues, and players have real names and logos- correct teams settings like managers, stadium name, and rivalries- all teams have real kits, and many of them are updated- no duplicated teams or players- applies smokepatch graphics like scoreboards, audiovisuals, and backgrounds.- adds many boots and balls and formation pictures- and many more-----Details:Leagues and Teamsall the leagues are ready for the new season, promoted teams are now available in their respective leagues, all the teams are with their correct attributes and settings, including the correct manager with photo, correct stadium names, and rivalries.every season a new teams selection is added to the database, SP database does not have any duplicate teams or players, with no fake names or players (except for the ML default teams and the editable teams)the fake leagues in the game are replaced with real leagues:Fake Europe League:this league is used for the German Bundesliga, all 18 teams of the new season are available.Fake AmericaLeague:the Colombian Liga Dimayor replaces this league, 20 teams participating are available.Fake AsiaLeague:Japan J1 League is available in this league slot, with all 20 teams available.two fully editable teams are still available in the game, pes united(Zalgiris Vilnius), and we united(Ceres Negros). You can use these teams to make your own. It is possible to export the team import it when we update the patch, see the tutorial section we take the liberty of adapting the season according to the game compatibility, to avoid problems in football life modes, you might find a missing or extra team depending on what game version is installed.The teams available in smokepatch V4HEREfor ID reference, our database is availableHERE-----Players and Statssmokepatch uses Konami stats for all the players, although this year we have to adapt the eFootball stats to conform with the PES, some stats would not show precise overall ratings due to differences in the player's details across games.Real faces:Real faces are not included in the patch due to their large size, but are available to download from the add-ons menu.* many users get a black screen at the end of some games, this is from faces added from other sources, use the smokepatch face pack, or be sure not to use any faces that have this bug.The player's database is availableHERE-----all the graphics files we create for the best quality and performance at the same time, with the lowest file size possible for high quality, the graphics (emblems, logos, kits, boots, balls, backgrounds) are all compatible with 4K resolution without losing quality, while consuming the same PC resources as the original game.Kits:all the teams in smokepatch have real kits, with more than 200 teams having this season's kits, more usually comes in later updates.Balls and Boots:smokepatch has 40 real balls and 100 real boots, a selection of the best brands* No changes in the boot pack, v4 has the same pack as in the previous version.* New season ball pack is created and provided by (Milad Behzadi)Formation Picture:about 95% of the players in the database have their correct and real mini-face, this pack is constantly updated in each patch version.Theme (Audio Visuals):smokepatch v4 has its own bundled theme that includes sp v4 audiovisual, we think that changing the theme every now and then will keep the game fresh, but users have the option to remove and revert to the game default theme using sp switcher, or alternatively, users can change it by applying other ones available at the website addons menu.-----Addons Compatibilityall SP addons for pes17 work with v4 as usualalternative league addon is version-specific, and cannot use for v4the stadium pack R7 is preinstalled and included in v4-----SP Switchera small switcher tool is included for various functions, located in the game folder, be sure the game is not running if you want to use this tool.this tool can deactivate or activate the patch to restore the original game, other options like removing graphics or sound are also available in this switcher.-----Installation1- Extract the installer files2- Run (smokepatch17.4.0.exe)*More detailed installation tutorial is availableHERENOTES:- the installer will upgrade any existing smokepatch version installed previously- changing the patch files or adding other mods is at our own risk.-SmokePatchtested on the full original game version- SmokePatchdoes not include the game itselfRecommended Optional Addons:SP17 mega face packSP17 Stadium Server (sider)SP17 Chants and Anthems Ask the publishers to restore access to 500,000+ books. The new release of Smoke Patch 17 for Pro Evolution Soccer 2017 PC game. No doubt about it Smoke Patch is one of the best patch for PES 2017 PC and also it contains many new updates for PES 2017 PC game.New Features :- new system files- overall performance enhancements- new graphics shaders- re-converted most faces for compatibility.- update leagues (19/20)- updated summer transfers- updated minifaces- updated graphics- converted kits from SP19.1- many other fixes and enhancements.General Features - includes all DP files- added for season 19/20- stats updated (pes20)- compatible with all game versions- real names for all players- real names and logo for all teams- added new teams- added new leagues (other leagues addons available)- added new classic teams- real kits for all teams- correct home stadium names- added a lot of real faces- added a lot of mini-faces- added real balls- added real ad-boards for stadiums- added 100 boots and 100 gloves- many others....Database Currently, our database have 647 total teams including hidden and classics teams, and over 20k players, all real players except the players in the editable teams, no duplicated teams, and stats are from the latest konami live update, we constantly keep updating the transfers and adding players if possible, you can participate by reporting any incorrect transfer in the comments section. Playersas there are many teams added to the game, many players are added in the database, we import database from our master database (contains over 40000 real players) and from recent konami database (13000 players excluding fake players), all the players added with their original game ID, if a players does not have one then we assign a temporary ID until it is added in the game database. our mini-face pack (formation picture) have a huge number that we always work on, updating the important ones and adding for the new players. Facesreal faces are no longer in the default patch to reduce the patch size, you can still download our facepack from addons if you choose to use it. if the installer finds faces installed by previous sp version, the installer will not remove and will use them, you can keep using them (around 99% same ID as old patch) or you can download this newer pack from addons. (when available) * it will take time to finish the new facepack due to many technical problems in the face mods. Teamsin smokepatch, all the teams are licensed, we create teams using their original game ID, teams promoted teams added for the new season replaced the relegated ones using their ID to preserve game modes started with previous version of the patch, although we will align the ID at some point in future updates two teams remained fully editable, pes united (bate borisov) and we united (madura united), you can use these teams to make your own, it is possible to export the team and import it when we update the patch, see tutorial section. Leagues:all the leagues are up to date for the current season, created all the promoted teams, fake leagues replaced with real leagues (Colombian league, Chinese league, German league) leagues have their ball assigned, correct and updated names for all competitions, the sleeve badges are active for all unlicensed leagues. Graphics:all the graphics files we create for best quality and performance at the same time, with the lowest file size possible for high quality, the graphics (emblems, logos, boots, balls, backgrounds) are all compatible with 4K resolution without losing quality, while consuming same PC resources as the original game. Stadiumsthe stadiums in smokepatch are default game stadiums, updated from the most recent game datapack, you can add more from addons Kitswe create and update kits constantly, all the teams in smokepatch have real kits, most of the kits are of the current season, we keep updating the kits and include the new contents in updates when we have sufficient new files ready. Addons:there are many more options you can add to smokepatch, check the addons section of the website, the addons are being upgraded periodically and we plan to add more options in the future.be sure to read carefully about any addon before using it to know more about its functionality and compatibility. Important:- alternative leagues addons does not work with this version, wait for new addonDownloadInstallation: 1- Extract patch filesget all parts and be sure all are completed, extract only part one the rest will be extracted automatically, don't move any of the installation files or folders and be sure you do not get any errors. 2- Run (smokepatch17.2.0.exe)run the installer and choose game option and installation folder, the patch must be installed in the same game folder, be sure you don't get errors and that the installer finished successfully if you have old smokepatch faces then they will be used for this patch.Homepage:- :- if you edit or generate the patch dpfilist be sure to READ THIS: changing the patch files or adding other mods is at your own risk.- adding or updating the game EXE is not the patch responsibility.- sider is not included, available as sider addons- this patch is made to focus on offline modes. SmokePatch17 9.5 (for PES17 PC)version 9.5.0 (all in one) (30.Sept.2017)update 9.5.2 (16.Nov.2017)----- Update 9.5.2:Fixed bug playing against Flamengo:a bug when playing against Flamengo team that prevented the game from loading, the problem originated in the ad boards of the Maracana stadium in big events, this is fixed now.Fixed LFP ball:the main La Liga official ball was not showing in the balls list, now it's working properly.Added extra cpk slots:we have added 8 extra slots for customization same as in previous versionsReconstructed league switcher:we got reports about a crash going to next season in ML, we test the patch in ML for seven consecutive seasons without any crash, but we reconstructed the league switcher to avoid any problems because we test the patch with the default leagues (first option), all options should work fine in all modes. General Features: Leagues:the new league switcher contains a variety of choices that you can choose from, all the teams will be available regardless of the leagues you choose, there is also an option to remove completely MLS teams from the Latin America continent. as in the previous versions, all the leagues have correct names and logos, it is worth mentioning that it is not possible to change the league structure without bugging the game. the 10 options in the league switcher are: Germany - Colombia - China- Germany- Colombia- China (African clubs in Asia)- Germany - Colombia - China (without MLS teams)- Turkey- Colombia- China- Russia - Colombia- China- Germany- Colombia- Japan- Germany- USA - Japan- Germany- USA- China- Germany- Mexico - China- Turkey - USA- Japan- Russia- Mexico - Japan Teams:this edition has 640 total teams (the game comes with 540), all teams and national teams can be used normally in FL modes.teams have correct logos, kits, squads, manager, stadium name, and fans color. Players:as you might imagine, adding such a big number of teams will result in a huge number of new players, all players created have correct attributes, there might be some minor errors since there are more than 4000 new players added, the number of real players in the patch is more than 13.000 players as the original game has fake teams and players, and incorrect names due to the lack of licensing, this also resulted in duplicated players, the patch removes and replaces all fake and duplicated players with real-life players. Stadiums:this version includes an updated stadium pack v3, the stadiums in the patch are 40 unique models, converted from previous smoke versions, we included a variety of locations for the stadiums, with high-quality texture and fans, and HD skies for all stadiums, the stadiums have a lot of special ad-boards, all leagues new and old have correct ad-boards, with a lot of the major teams having their own special ad-boards. we have created HD turfs for the stadiums for optimal quality and game-play, we are aware that some find it bright or saturated, some find it dark, it is a matter of taste, our only goal is to have them as real as possible, you can always change the luminosity of your screen if you have other preference. LOW-QUALITY setting users will not benefit from the full potential of the game graphics due to limited system power, the HD turfs will show a flat green color at night, we made special turf similar to Konami turf that is compatible with low-quality settings, can be downloaded and installed separately from addons. all teams in the game have correct stadium names, but as you surely know there is a bug that shows default names for teams without the original stadium models in FL modes, we still can't find a solution for this so far. Boots:this version uses smoke boot pack v3, with 12 new boots updated, new boots: adidas messi nemezizadidas Ace 17 Primekitadidas Ace 17 Purecontrolnike mercurial superfly CR7nike Vapor XI Neymarnike tiempo 7nike hypervenom Phantom IIIpuma EvoPower Vigor rosepuma EvoPower Vigor redminizuo Rebulumbro UX Accurounder Armour Clutchit Others:the patch adds more real balls to the game, including a couple of fantasy balls, a lot of other things are also added such as referees' kits and faces, a lot of real goalkeeper gloves, and much other stuff that will make the game better and better the smoke patch uses only original game-play, we never change or edit or modify the exe in any way, as we believe that Konami did a fine job with that.Installation:1- Extract patch filesdownload two parts and be sure all are completed, extract only part one the rest will be extracted automatically, don't move any of the installation files or folders.2- Run Setup v95.exerun the installer and choose the game installation folder, the patch must be installed in the same game folder, be sure you don't get errors and that the installer finished successfully.* same for update NOTES:- the installer will upgrade any existing smokepatch version installed previously- changing the patch files or adding other mods is at your own risk.- SmokePatch tested on the full original game version- SmokePatch does not include the game itself.
