The role of Wildlife Services is to provide assistance in the management of wildlife damage in an effort to protect human health and safety, agriculture, property and endangered species. This is accomplished by providing technical recommendations to resolve, curtail or prevent damage to residents, domestic animals, property and other resources. Please call 1-800-486-0010and leave message. A Wildlife Services Agent will contact you in order of calls received. Please be aware that agents are often out in the field and may not be able to respond to messages right away. NOTE: For emergencies that involve immediate threat to life, please dial 9-1-1. For calls regarding domesticated pets in the unincorporated areas of the county, please call the Department of Animal Services at (619) 236-2341. For domestic animals needing rescue in the unincorporated areas of the county, please call the Department of Animal Services at (619) 236-2341. For calls regarding domestic animals in the incorporated cities, please see this listing of Animal Control Agencies by zip code. For inquiries regarding injured or orphaned wildlife, call Project Wildlife at (619) 299-7012. For more information on the management of wildlife damage please visit Wildlife Services. If youve found an injured animal, contact our hotline at619-225-WILD (9453).If you are able, bring the animal to the Pilar & Chuck Bahde Wildlife Center at 5433 Gaines St. Do not attempt to care for the animal yourself. Do not give it food or water. Keep the animal in a dark, quiet box or crate and bring it to the Wildlife Center. The Wildlife Center is staffed from 9am-5pm, 7 days a week and the Drop-Off area is open 24/7.What Should I Do if I Find an Injured Wild Animal?Click here for full information for basic rules and for special notes on certain animals.Other permitted wildlife drop-off locations include: San Diego Humane Society Escondido Campus 3500 Burnet Drive Escondido, CA 92027 619-299-7012, ext. 2737 San Diego Humane Society Oceanside Campus 572 Airport Road Oceanside, CA 92058 619-299-7012, ext.2000 or ext.2050 Mission Animal Bird Hospital 655 Benet Road Oceanside, CA 92058 760-433-3763 Department of Animal Services Carlsbad 2481 Palomar Airport Road Carlsbad, CA 92011 619-767-2675 San Diego Wildlife Center Carlsbad 2380 Camino Vida Roble unit G, Carlsbad, CA 92011 760-621-6888 All Pets Animal Hospital Mammals Only 149 S. San Diego Humane Societys Pilar & Chuck Bahde Wildlife Center is open daily, 10 a.m. - 6 p.m. Before capturing a wild animal, please review this information to ensure intervention is needed. If you are able, please bring the animal directly to the Pilar & Chuck Bahde Wildlife Center.\* Pilar & Chuck Bahde Wildlife Center 5433 Gaines St. San Diego, CA 92110 MAP Hours: 10 a.m. - 6 p.m. daily (except holidays) For emergency assistance, please call San Diego Humane Society at619-299-7012 (press 1). \*If you cannot make it to the Bahde Wildlife Center, animals may also be dropped off at our Oceanside, Escondido or Ramona CampUSDuring regular business hours. Project Wildlife Since 1972, Project Wildlifes dedicated staff and volunteers have given injured, orphaned, and sick wild animals a second chance at life. This commitment to helping wild animals has grown tremendously and Project Wildlife is now one of the largest wildlife rehabilitation organizations in the country. Our mission is to improve the quality of life for local wildlife and the community, serving as the primary resource for wild animal rehabilitation in San Diego County. Wake Up With Wildlife: San Diego's Migrant Bird Life Twice each year, in one of natures most amazing events, billions of birds make enormous and hazardous journeys from their breeding grounds to wintering areas. Some travel as much as 25,000 miles every year, from the high Arctic to the tip of South America and back. Of the more than 500 bird species found in San Diego, almost 2/3 of them migrate into or out of the area every spring and fall. Join avid birder Stan Walens, who has collected almost 40 years of data on seabird populations in San Diego, talk about how the fascinating process of migration works and the benefits and problems it presents. Read More Wake Up With Wildlife: Project Coyote Join Project Coyote Ranching with Wildlife Coordinator, Keli Hendricks, for a lively presentation about coexisting with coyotes. Topics will include coyote safety, education, and programs and resources available to help residents and communities better understand and coexist with our wild neighbors. Read More Love Is in the Air! Local wildlife may cross your path during breeding season. These tips will help to avoid unwanted love from wildlife while animals are seeking out mates. Read More MORE Who We Are Our staff and volunteers operate under one guiding principle: compassion. It is through this unwavering compassion that we can help more than 10,000 native birds, mammals, reptiles and amphibians each year and more than 320 species to-date! We also support thousands of other animals and people through community outreach, partnerships and telephone/virtual triage. San Diego County is one of the most biologically diverse areas in the United States with the greatest number of endangered species. Our Project Wildlife program cares for sick, injured and orphaned wildlife from all over the county, and we are proud to be a resource our community can depend on to coexist peacefully with their wild neighbors. What Is Wildlife Rehabilitation? Wildlife rehabilitation is the treatment and care of sick, injured and orphaned wildlife in an effort to release them back to their natural habitat. Project Wildlife is permitted to rehabilitate native California wildlife and migratory birds through permits granted by the California Department of Fish and Wildlife and the United States Fish and Wildlife Service. We operate under strict protocols set forth by our permitting officials, science-backed research, veterinary consultation and years of experience to make the best decision for a positive outcome with each animal in our care. Rehabilitating wildlife without the appropriate permits can cause potentially fatal damage to the animal and is punishable by fines up to \$25,000 for any wildlife kept more than 48 hours. If you find a wild animal in need of care, do not attempt to provide care yourself. If you are unsure if an animal is in need of rehabilitation, our Wildlife Help Hub provides set-by-step guidance. If a wild animal is injured, every moment may be critical, so please bring the animal to Project Wildlife or to another permitted wildlife rehabilitation center in your area as soon as possible. Donate Amazon Wish List Volunteer Collaborative Partners Community Services/Non-ProfitsHours: TipsHoursPhotosOctober 2024Strmbled upon what appeared to be an injured/weak hawk in our parking lot. This was just prior to dusk. We made it to the San Diego Project Wildlife office before they closed. Very thankful that there is a place where they can evaluate and treat these precious animals.August 2024Had security meet me there at 11:30 pm to care for a baby bird.Nice people. Thankful for their help.August 2024Took in the injured bird and will resettle when we'll.More Comments(132)About Project WildlifeSince 1972, Project Wildlifes dedicated staff and volunteers have given injured, orphaned, and sick wild animals a second chance at life. For five decades, this essential program has served as our regions safety net for wild animals in need. Since its founding, Project Wildlife has rescued and cared for hundreds of thousands of injured, orphaned or sick animals, and has transformed into one of the largest wildlife rehabilitation programs in the country.It all started in 1972 when a group of San Diegans spoke out after witnessing barn swallows being sprayed by power washers to keep them away from what was then Jack Murphy Stadium in Mission Valley. This early group of wildlife advocates decided it was time to bring wildlife to the forefront of the citys consciousness. What began as one North Park home with a backyard space dedicated to helping wild animals in need soon grew into a network of satellite homes, each with their own aviaries, pens, kennels or other enclosures to give injured or orphaned wildlife a place to recover before returning them to the wild. Everyday citizens were at the core of caring for these animals in need, volunteering their time and resources to help rehabilitate them. After officially incorporating as a nonprofit in 1976, Project Wildlife grew into a network of 70 satellite facilities and 600 volunteers. The largest leap in Project Wildlifes growth came in November 2014 when it merged with San Diego Humane Society. This merger was also one of the most meaningful milestones in San Diego Humane Societys history, representing the organizations commitment to serve all animals, companion and wild. In recognition of that commitment, San Diego Humane Society undertook an important mission: creating a permanent facility for wildlife in San Diego County. In March 2019, San Diego Humane Society opened a state-of-the-art 5,200-square-foot home for wildlife the Pilar & Chuck Bahde Wildlife Center. For the first time ever, San Diego now had a facility befitting the lifesaving work performed by Project Wildlife every day. Just a year later, Project Wildlife welcomed the 13-acre Ramona Wildlife Center, where they care for apex predators including bears, mountain lions and bobcats. Today, San Diego Humane Societys Project Wildlife program boasts a highly skilled wildlife medicine team, including an intern program to train the next generation of wildlife veterinarians. They care for approximately 13,000 wild animals each year. Project Wildlife exists because community members saw a need and decided to do something about it. Their spirit lives on in every volunteer with an aviary in their backyard, every citizen who brings in an animal hit by a car and every donor who sends a gift to support wild animals.Here's to another 50 years of protecting San Diegos wildlife.Dr. Gary Weitzman, DVM, MPH, CAWA, is anauthor, veterinarian and passionate animal welfare advocate. He has served as president & CEO ofSan Diego Humane Societysince 2012. Support community news in the public interest! As nonprofit news, we rely on donations from the public to fund our reporting -- not special interests. Please donate to sustain East County Magazine's local reporting and/or wildfire alerts at to help us keep people safe and informed across our region.
