If Location History is turned on for your account, you may find Timeline in your app and account settings. Learn more. Location History is aGoogleAccount setting that creates Timeline, a personal map that helps you remember: Places you go Routes to destinations Trips you take It can also give you personalized experiences across Google based on where you go. When Location History is on, even when Google apps arent in use, your precise device location is regularly saved to: Your devices Google servers To make Google experiences helpful for everyone, we may use your data to: Show information based on anonymized location data, such as: Popular times Environmental insights Detect and prevent fraud and abuse. Improve and develop Google services, such as ads products. Help businesses determine if people visit their stores because of an ad, if you have Web & App Activity turned on. We share only anonymous estimates, not personal data, with businesses. This activity can include info about your location from your device's general area and IP address. Learn more about how Google uses location data. Things to know about Location History: Location History is off by default. We can only use it if you turn Location History on. You can turn off Location History at any time in your Google Account's Activity controls. You can review and manage your Location History. You can: Important: Some of these steps work only on Android 8.0 and up. Learn how to check your Android version. You can turn off Location History for your account at any time. If you use a work or school account, your administrator needs to make this setting available for you. If they do, you'll be able to use Location History as any other user. Go to the "Location History" section of your Google Account. Choose whether your account or your devices can report Location History to Google. Your account and all devices: At the top, turn Location History on or off. Only a certain device: Under "This device" or "Devices on this account," turn the device on or off. Google can estimate your location with: Signals like Wi-Fi and mobile networks GPS Sensor information Your device location may also periodically be used in the background. When Location History is on, even when Google apps arent in use, your devices precise location is regularly saved to: Your devices Google servers When youre signed in with your Google Account, it saves the Location History of each device with the setting Devices on this account turned on. You can find this setting in the Location History settings on your Google Account. You can choose which devices provide their location data to Location History. Your settings dont change for other location services on your device, such as: Google Location Services Location Sharing Find My Device If settings like Web and App Activity are on but you turn off Location History or delete location data from Location History, your Google Account may still save location data as part of your use of other Google sites, apps, and services. This activity can include info about your location from your devices general area and IP address. Delete Location History You can manage and delete your Location History information with Google Maps Timeline. You can choose to delete all of your history, or only parts of it. Important: When you delete Location History information from Timeline, you won't be able to see it again. On your Android device, open the Google Maps app . Tapyour profile picture or initialYour timeline . In the top right, tap More Settings and privacy. Under "Location settings," tap Delete Location History range. Follow the on-screen instructions. On your Android device, open the Google Maps app . Tapyour profile picture or initialYour timeline . Tap Show calendar . Select which day you want to delete. Tap More Delete day. Follow the on-screen instructions. On your Android device, open the Google Maps app . Tapyour profile picture or initialYour timeline . Tap Show calendar .
