Everyday 332 million people open Snapchat on their phones, and with our camera, can start conversations with their real friends. Today, we're introducing Snapchat for Web, a new way for our community to stay connected through our camera when they're at their computers. Open your laptop and head to web.snapchat.com using Chrome to start a call or pick up where chats left off on mobile. With more than 100 million Snapchatters using our voice and video calling each month on average, we're excited to offer a new way for our community to keep conversations going on their computers, where they're already working, learning, and browsing.*Snapchat for Web includes top messaging features like Chat Reactions and Chat Reply, along with Lenses which will roll out soon. Snapchat for Web will be available to Snapchat+ subscribers to start in the United States, United Kingdom, and Canada, and Snapchatters across Australia, and New Zealand. We can't wait to bring it to our entire global community soon. So, fire up your laptop, and call your best friend... Snapchat is now available on the web! Oops! Something went wrong...Try another browser, reload the page, or visit Snapchat Support for help.Snapchat v13.47.0 (prod 1a300ead) This is my first time writing a review for a app, so i'm just trying it out and hoping Snapchat takes this suggestions. So this app is pretty good, you can add multiple friends, use funny filters and etc. It's a great talking app, and it's something I use in my everyday life, talking to friends and keeping up my streaks. I've seen the new updates like Snap+ which i think is cool but not necessary, though I do like having it. Something that popped into my mind though is them maybe being able to have a button that can clear all saved messages (bc you can save things into chat and it won't get deleted after 24 hr) instead of going through the chat and unclicking all of them. I think this is useful for someone who wants to start a fresh chat or doesn't want to have past convos on there.(Ex: Their past convos w their ex that they still have added or smth and they are too lazy to go through months worth of convos). I think this would be a cool feature since I honestly don't want to go through all the trouble. I know they added a button that can automatically save all chats so why not have one that does the opposite you know? But other then that, i think that's it. Irs a pretty cool app and even though some people might have trouble with it, i like it as long as you're careful not to add creeps and stuff
