It all started on a seemingly normal night when my girlfriend and I got into a heated conversation. It was about something mundane, but when I sent her a thoughtful emoji to show that I was thinking about her idea, she completely misunderstood me. She thought I was questioning her idea. The argument escalated into a barrage of messages that
became increasingly heated. Suddenly, communication ceased, and we spent the rest of the evening in silence and frustration. In that silence, as the screen of my phone went dark, I realized how one small symbol could cause so much misunderstanding and pain. Misunderstandings when communicating with Emojis. The first website was created in
2013 as a modest German-language site on which I published the meanings of text emoticons. Back then, emoticons were not as ubiquitous as they are today, and emoticons like:-) and :-) dominated digital communication. In 2015, when the emoji madness really started and more misunderstandings in emoji communication appeared, I
realized that it was time to expand my ambitions. I dreamed of creating a comprehensive source of emoji meanings that anyone could use. While studying computer science, I continued to study smileys and emoji. Even my bachelor's and master's theses were about emoji! In my master's thesis, I researched the interesting uses of emoticons in e-
commerce and how they influence purchase decisions. Did you know? Emoticons can make customers more likely to buy a product! Emojis can positively influence the likelihood of purchase. Through my studies, travels and experiences with social media, I developed a deep understanding of emoji and their meanings in different cultures. I also started
collecting and publishing the meanings of all the emoticons in different languages. Over time, talented writers from around the world joined my project to contribute to the international emoji are available in 20
different languages! I also started an emoji lexicon on emojis.net with a great team of friends, where we analyze each emoji in detail, especially its emotional impact, meaning of emojis can be interpreted differently around the world. The goal is to create a unique resource that everyone can use to find out the meaning of
an emoji - and maybe even avoid arguments with your loved ones . I want to allow everyone to share their own thoughts and opinions about emoji, thus promoting a diverse understanding of their use. Together, we can better understanding of their use. Together, we can better understanding should be a source of their use.
for emoji meanings. We are constantly working to improve the site, incorporating the latest research and user feedback to ensure it is always up to date. Mission: To make the meanings of emojis accessible to everyone in the world. Today is 2024 and there are many plans for the future. For example, all languages will be updated and the valuable
information from user comments will be incorporated into the meanings of the emoji. There are also plans to add more languages to reach even more people around the world. I invite you to dive into the fascinating world of emoji at the
right time might even save a relationship or just put a smile on your face. Thank you for visiting my website and taking the time to read my story. Have fun exploring and sharing the wonderful world of emojis! Mark Berger - Founder and author of EmojiMeanings.net Questions or suggestions? Then get in touch with me. You can send an email to
